

This project is implemented based on the sample meta-events-action and state diagram provided in the class with minor changes.

In state diagram, S5->S4, S8->S5 for convience.

In gaspump 1, when cash is not enough, stop pump and return the remaining cash.

The codes are saved separately in several packages.

## 1)AbstractFactory

Abstract class AF

Class CF\_1

Concrete factory for gaspump 1.

Class CF\_2

Concrete factory for gaspump 2.

## 2)Data

Abstract class DataStore

Class DS\_1

Store data for gaspump 1.

Class DS\_2

Store data for gaspump2.

3)Driver

Class Driver

Driver class run the system.

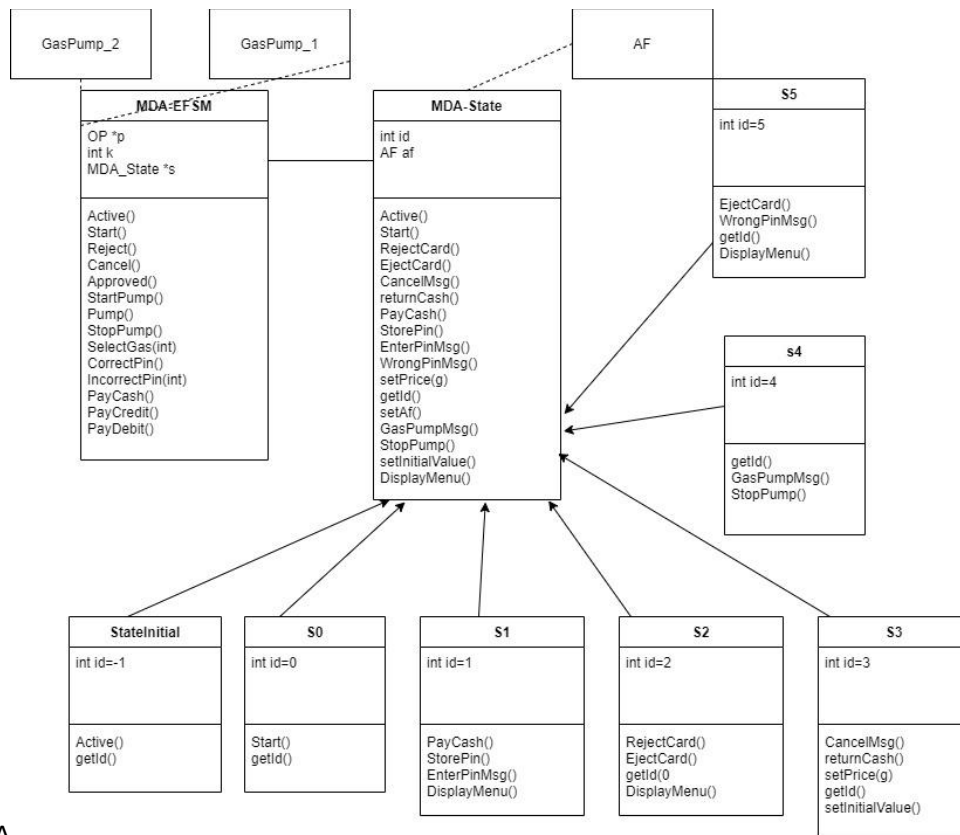

4)GasPump

Class GasPump\_1

Create object gaspump 1, includes all gp1 functions.

Class GasPump\_2

Create object gaspump2, includes all gp2 functions.

5)MDA

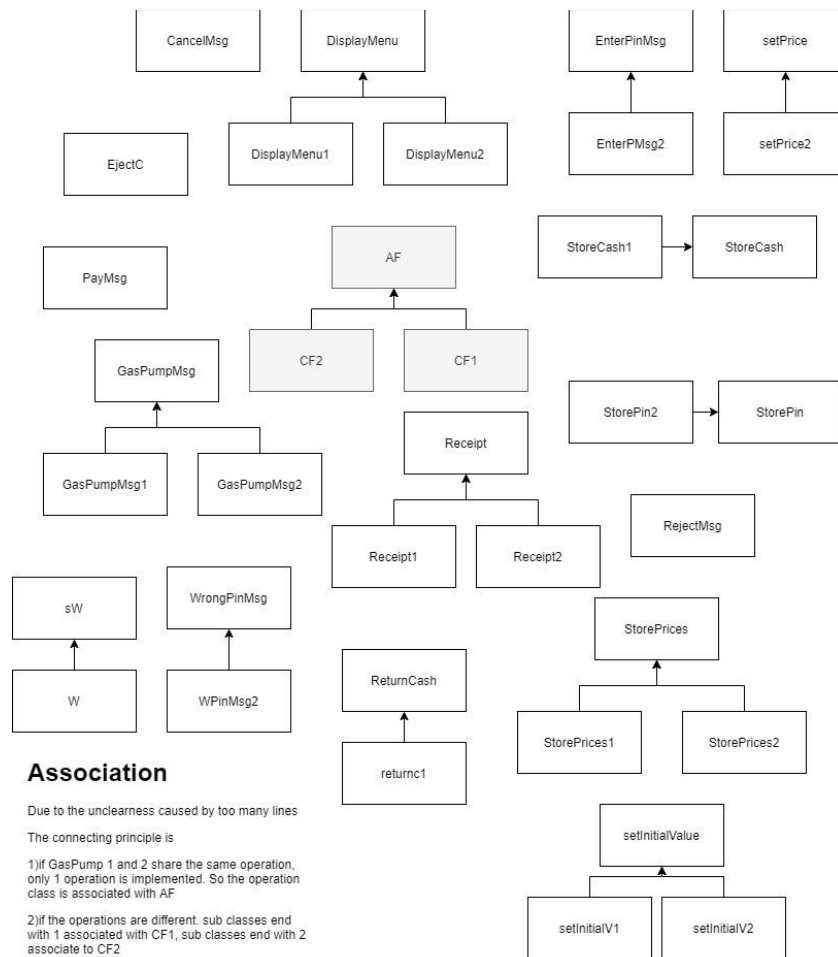

Class MDA\_EFSM

Receive meta events and activate actions in current state class.

Abstract Class MDA\_State

MDA\_EFSM has 7 states, centralized state pattern.

Class StateInitial, Class S0, Class S1, Class S2, Class S3, Class S4, Class S5

## 6) Operation

In this package, it contains all the actions. The name is the function of the classes.

Class CancelMsg....

```
project586 src \ Operation \ return1
Run: GPS
Operation: Start()
Please select your payment type.

-----
Select Operation:
0-Activate,1-Start,2-PayCredit,3-Reject,4-Cancel,5-Approved,6-PayCash,7-StartPump, 8-PumpLiter, 9-StopPump, q-quit
2
Operation: PayCredit()

-----
Select Operation:
0-Activate,1-Start,2-PayCredit,3-Reject,4-Cancel,5-Approved,6-PayCash,7-StartPump, 8-PumpLiter, 9-StopPump, q-quit
3
Operation: Reject()
CREDIT CARD REJECTED
CARD HAS BEEN EJECTED.

-----
Select Operation:
0-Activate,1-Start,2-PayCredit,3-Reject,4-Cancel,5-Approved,6-PayCash,7-StartPump, 8-PumpLiter, 9-StopPump, q-quit
```

```
project586 src \ Driver \ GP2
Run: GPS
-----
Select Operation:
0-Activate,1-Start,2-PayCredit,3-Reject,4-Cancel,5-Approved,6-PayDebit,7-Pin,
8-Diesel, 9-Regular, a-Super, b-StarPump, c-PumpGallon, d-StopPump, e-FullTank, q-quit
7
Operation: Pin(String p)
Enter your pin:cbg
Sorry, the pin is incorrect.

-----
Select Operation:
0-Activate,1-Start,2-PayCredit,3-Reject,4-Cancel,5-Approved,6-PayDebit,7-Pin,
8-Diesel, 9-Regular, a-Super, b-StarPump, c-PumpGallon, d-StopPump, e-FullTank, q-quit
abc
Operation: Super()

-----
Select Operation:
0-Activate,1-Start,2-PayCredit,3-Reject,4-Cancel,5-Approved,6-PayDebit,7-Pin,
8-Diesel, 9-Regular, a-Super, b-StarPump, c-PumpGallon, d-StopPump, e-FullTank, q-quit
```

```
project586 src \ Operation \ return1
Run: GPS
-----
Select Operation:
0-Activate,1-Start,2-PayCredit,3-Reject,4-Cancel,5-Approved,6-PayCash,7-StartPump, 8-PumpLiter, 9-StopPump, q-quit
8
Operation: PumpLiter()
1 liters of Gas have been pumped, the total amount is $4

-----
Select Operation:
0-Activate,1-Start,2-PayCredit,3-Reject,4-Cancel,5-Approved,6-PayCash,7-StartPump, 8-PumpLiter, 9-StopPump, q-quit
8
Operation: PumpLiter()
1 l gas has been pumped.
$4 is charged.
Return Cash:1.8

-----
Select Operation:
0-Activate,1-Start,2-PayCredit,3-Reject,4-Cancel,5-Approved,6-PayCash,7-StartPump, 8-PumpLiter, 9-StopPump, q-quit
